Jasmin Trotter

Full Stack Web Developer

Summary

Web Developer with background as a dance education leader. Recent graduate of Thinkful full stack program, and capable of building full stack web apps with JavaScript, Node, and React. I want to contribute to the creation of useful products for individuals or organizations. Seeking an challenging environment that encourages my growth and strengthens my skills.

Experience

2018 - present

Full Stack JavaScript Developer

Academic Projects
STUDENT PORTAL
This is a full stack, responsive web application designed to allow ballet students to create an account and access their own dashboard to purchase classes and review a list of their purchase history.

JOIN CLASS
A responsive, full stack application for ballet students to sign up for class, view the schedule of classes, and cancel any current reservations.

QUOTUMBLR
 API hack: this responsive web application integrates with Tumblr and FavQ's. Quotumblr chooses a random word from user's selected Tumblr post, then using FavQ's API, returns a quote containing that word.

All of the above projects can be viewed from jasmintrotter.github.io/portfolio/

2015 - present

Owner, Ballet Instructor

Ballet Body by Jasmin
Responsibilities:
- Create a welcoming and judgement-free environment for all bodies to learn ballet, by being sensitive to the needs of students from a broad range of ages, sizes, and abilities.
- Build and maintain website and manage social media presence, write online content and design graphics.
- Develop software to track customers, attendances, and class purchases.

Education

2018

Thinkful

Completed a 6 month course on modern full stack JavaScript development. Learned industry best practices and practical software development standards with the mentorship of a senior web developer.
